Holiday Season: its Clicks over Picks!

It's that time of the year again when attractive deals and promotions lure customers to stuff their shopping bags. The holiday season has kicked off with Thanksgiving on 24 November, followed by Black Friday and Cyber Monday. The US National Retail Federation (NRF) expects holiday sales this year to grow 3.6% YoY to USD 655.8 bn (barring autos, gas and restaurant sales in November and December). This is significantly higher than the ten-year average of 2.5% and beats the seven-year average of 3.4% since recovery began in 2009. The NRF has also reported that the long shopping weekend from Thanksgiving to Cyber Monday alone has contributed a whopping 15% to this year's holiday sales.

The NRF forecasts non-store sales (e-commerce and m-commerce) to grow 7–10%, reaching an all-time high of ~USD 117 bn. This year's Cyber Monday became the biggest online shopping day ever, with online sales at USD 3.39 bn, growing 10.2% YoY; while Black Friday registered the highest mobile revenue at USD 1.2 bn, growing 48% YoY. Total online sales growth (Thanksgiving to Cyber Monday) was 17.7% YoY, while in-store sales fell 1.0%.

Online shopping, along with its benefits of price comparison and higher discounts, has depressed foot-fall in brick-and-mortar stores. However, high shipment costs may still pressurise margins for e-commerce players. Overall, online traffic grew 2% YoY to ~154 mn even though average spending declined 3.4% to USD 289.19. In terms of assortment, traffic was the strongest for electronics (led by TVs, PlayStations, laptops and mobile phones), followed by apparel, footwear and meat (primarily turkey).

Retailers have also prepared themselves well to capture the seasonal upturn. Most saw solid traffic and comparable sales growth. Wal-Mart expanded its online offerings to 23 mn products (from 8 mn last year) with new brands and over 3 000 marketplace sellers. To grab the maximum share of sales, it began offering its Cyber Monday deals two days earlier this year at 12am on Black Friday. Costco also launched early Black Friday deals (online only) for its members and benefited from the larger reach of its new co-branded Visa card (vs. the Amex card used previously). Amazon built 26 new warehouses and increased its

Shalinee G
Equity Expert

Editorial (2/2)

workforce by 40% with 120 000 temporary workers (trained by robots to minimise the training time to two days) to support the peak holiday sales.

NRF expects retailers to hire 640k–690k seasonal workers this holiday season, in line with last year's 675k new holiday positions. Most retailers are thus poised for holiday cheer given sound consumer sentiment and healthy spending on the back of encouraging job and wage growth. Strong credit positions with low debt levels also provide supportive ground for a hearty holiday season.

Only 9% of consumers finished holiday shopping till Cyber Monday, down 200 bps YoY which indicates greater momentum ahead. The leading retailers in our coverage, viz., Amazon, Wal-Mart, Costco and Kroger have already identified the evolving consumer preference for online and mobile channels and are taking significant strides in this direction. Higher sales of electronic goods during the holiday season (mainly TVs, handsets, and laptops) should also benefit the tech majors Apple and Samsung. We expect all six stocks in our basket to make the most of the holiday season.

This document presents equity ideas exclusively provided for potential investments.

Focus: Basket of Stocks (1/3)

Amazon.com Inc (AMZN-US) – BUY – Target Price: USD 880.00

Investment Case: Amazon's investments in infrastructure, web services and logistics have enabled it to generate strong cash flow growth and higher returns, a trend we expect to continue. We view Amazon to be well-placed to capitalise on the global growth in e-commerce and m-commerce. Global e-commerce specifically should continue to gain market share from traditional retailers with improved penetration. The company's high-margin cloud should continue to facilitate revenue growth in our view; along with the Amazon Prime and Fulfilment programmes driving market share.

Main Risks: Amazon's e-commerce business is part of a highly disruptive space and could be affected by superior competition from players with new technology, coupled with increased pressure from offline retailers providing heavy discounts. Macroeconomic headwinds leading to a slowdown in consumer spends may affect the company's revenues.

Company Description: Amazon.com, a Seattle-based Fortune 500 company, is one of the world's largest online retailers. It also operates Amazon Web Services (AWS), a leading cloud-based computing platform, and provides marketing and promotion services (online advertising and cobranded credit-card agreements).

For a detailed analysis, please refer to the Amazon Equity Note, which can be found [here](#).

Apple Inc (AAPL-US) – BUY – Target Price: USD 130.00

Investment Case: Apple is aiming to become a leading player in the Internet of Things (IoT) space and its new products (like Watch and TV) and services are aimed towards this objective. Given its strong user connect, we believe this objective is attainable and should add to revenues in the coming years. In addition, its product sales growth cycle is showing strong growth.

Main Risks: China is Apple's second-biggest market, and any slowdown in the Chinese consumer demand could significantly impact Apple's sales growth. The company is facing stiff competition in the tablet market (iPad) with multiple products at cheaper price points. Due to this, the segment is expected to be under pressure in the next few years.

Company Description: Apple is a leading manufacturer of PCs and mobile communication devices. It also offers portable music devices (the iPod) and software for all its devices. Through its devices and software, such as iOS, iTunes and App Store, the company is building an ecosystem around users.

For a detailed analysis, please refer to the Apple Equity Note, which can be found [here](#).

Focus: Basket of Stocks (2/3)

Costco Wholesale Corp. (COST-US) – BUY – Target Price: USD 166.00

Investment Case: In our view, healthy addition of new members, high renewal rate, addition of new private-label products, international expansion and potential fee hike in the US and Canada should help Costco maintain strong growth in net sales and MFI. Further, Costco's high bargaining power with its vendors (due to bulk volumes) enables it to price its products competitively and grow its margins. Costco's recent shift to Citibank's Visa credit card is bound to drive membership growth, backed by Visa's greater reach and a 40–50% improvement in reward programme.

Main Risks: Increase in membership fees could impede the growth rates for both memberships and renewals, which in turn could weaken Costco's prospects for near-term and long-term earnings growth. The company's margins may be pressured as it plans to make price investments to be ahead of competition. Opening of new stores would cannibalise sales in existing stores and hamper their revenue contribution.

Company Description: Costco is the second-largest American membership-only warehouse club retailer. It operates 715 warehouses, spread across the US and Puerto Rico (501), Canada (91), Mexico (36), UK (28), Japan (25), Korea (12), Taiwan (12), Australia (8) and Spain (2). It also operates e-commerce websites in the US, Canada, UK, Mexico, Korea and Taiwan.

For a detailed analysis, please refer to the Costco Equity Note, which can be found [here](#).

Kroger Co. (KR-US) – BUY – Target Price: USD 36.30

Investment Case: Food deflation in the US appears to be nearing a trough and should improve from 4Q16, serving as a tailwind for Kroger. Kroger has consistently grown market share with 51 quarters of identical sales growth and EPS-accretive acquisitions of established local players (Roundy's, Harris Teeter, Vitacost.com), which seems sustainable to us. Kroger is poised to benefit from evolving customer trends with its investment in digital platforms and best-in-class customer analytics, focus on health and wellbeing with the recent acquisition of Axiom Pharmacy, and improved assortment with private and organic/natural labels.

Main Risks: Kroger's investment-grade rating depends on its ability to maintain its net debt to adjusted EBITDA ratio at 2.0–2.2x. Kroger faces stiff competition to further increase its market shares from Wal-Mart, Amazon and niche players in organic and eco-friendly products. Prolonged food deflation in the US would hurt Kroger's growth prospects.

Company Description: Kroger is the second-largest food retailer in the US (after Wal-Mart) with annual sales of USD 108.5 bn in FY15. Kroger operates 2 778 retail stores in 35 states under 20+ banners in 4 formats: supermarkets, multi-department stores, marketplace and price-impact warehouse stores. It also has 785 convenience stores and 323 jewellery stores.

For a detailed analysis, please refer to the Kroger Equity Note, which can be found [here](#).

Focus: Basket of Stocks (2/3)

Samsung Electronics (SMSN-GB) – BUY – Target Price: USD 810.00

Investment Case: Investors have reset expectations based on the management's profit warning following the Note 7 discontinuation, and we expect a gradual recovery in the mobile segment, driven by stronger demand for Galaxy S7/S7 Edge followed by the 1Q17E launch of the flagship Galaxy S8. Its semiconductor business should benefit from better average selling prices in the near term due to a healthy supply– demand scenario for DRAM/NAND and solid demand for OLEDs.

Main Risks: DRAM/NAND prices could trend lower in the short term due to stagnating demand for PCs/mobiles and higher supply growth by major industry players (yield improvements), thereby impacting Samsung's semiconductor segment margins. Given the quality issues related to Samsung's Note 7 phones, a potential deterioration of Samsung's long-term brand value could lead to its market share loss to competitors.

Company Description: Samsung Electronics, the flagship company of the Samsung Group, is one of the world's leading producers of consumer electronics and semiconductor components. Samsung is the world's top manufacturer of smartphones, DRAM and flash memory. It also holds the number one position in the global TV market.

For a detailed analysis, please refer to the Samsung Electronics Equity Note, which can be found [here](#).

Wal-Mart Stores, Inc (WMT-US) – BUY – Target Price: USD 79.00

Investment Case: Wal-Mart is known for its 'Everyday Low Prices' (EDLP) strategy. We believe the company's emphasis on a disciplined expense-management system and cost-saving programmes should enhance its ability to maintain its price position and remain ahead of competition. Wal-Mart's strategy to restructure the sales growth pie (by increasing the contribution of ecommerce) is a positive step, aimed at capturing the acceleration in online sales. We expect Wal-Mart's acquisition of Jet.com, (a US-based ecommerce start-up) to provide long-term benefits by strengthening its ecommerce offerings, improving its delivery channels and facilitating warehouse optimisation.

Main Risks: Wal-Mart's Jet.com acquisition would increase losses in ecommerce in the short term, where it has already been registering deficits. Wal-Mart's large market share may pose a hurdle to its long-term ability to continue gaining incremental market share. Continued food deflation in the US and the UK and adverse currency movements could prove to be a significant headwind for Wal-Mart's top-line growth.

Company Description: Wal-Mart is the world's largest brick-and-mortar retailer by revenue (USD 482 bn in FY16). It operates through a chain of hypermarkets, supercentres, neighbourhood markets, discount department stores, grocery stores and warehouse clubs. It has presence in 27 countries outside the US and operates ecommerce websites in 10 countries.

For a detailed analysis, please refer to the Wal-Mart Equity Note, which can be found [here](#).

Macroeconomic Views

China: Manufacturing PMI continues to improve in November

China's NBS manufacturing PMI rose to 51.7 in November from 51.2 in October, beating the consensus forecast of 51.0. This was the highest reading since mid-2014 and the fourth consecutive month of an above-50 reading, which suggests continued growth momentum in 4Q16.

Brazil: Industrial production declines in October

Brazil's industrial production declined 1.1% MoM in October, after increasing 0.5% in September. However, this was still higher than expectations of a 0.8% decline. Capital goods, intermediate goods and consumer goods shrank 2.2%, 1.9% and 0.4% respectively.

Rating System

Investment Rating Definitions:

Buy	Stock that is expected to outperform its MSCI sector index over a 12-month investment horizon.
Neutral	Stock that is expected to perform in line with its MSCI sector index over a 12-month investment horizon.
Sell	Stock that is expected to underperform its MSCI sector index over a 12-month investment horizon.
Restricted	Covered stock that is not rated or assigned a target price as the Societe Generale group has a capital market transaction with that company.

Product Risk Rating

The product category of single equity, stock, share is rated at '4'.

In order to draw the attention of potential investors to the risk linked to each investment solution, Societe Generale Private Banking has ranked each product according to its own specific risk scale from the lowest risk (class 0) to the highest risk (class 4). The risk classification is a Societe Generale Private Banking internal risk indicator. These internal indicators are based on the Value at Risk 95% 1 year (VaR). The VaR corresponds to the maximum amount that the portfolio being considered could lose in normal market conditions over a given period with a given probability (past performances and simulations of performance shall not be considered as a reliable indicator of future performance). If the VaR 95% 1 year is y%, this means that there is a 95% probability that the portfolio will not lose more than y% of its value in one year.

Risk Levels

Losses

0 - Lowest Risk	There is a 95% probability that the product will not depreciate in value in one year.
1 - Low Risk	There is a 95% probability that the product will not lose more than 5% of its value in one year.
2 - Medium Risk	There is a 95% probability that the product will not lose more than 15% of its value in one year.
3 - High Risk	There is a 95% probability that the product will not lose more than 30% of its value in one year.
4 - Highest Risk	There is a minimum of 5% probability that the product will lose more than 30% of its value in one year.

Calculation Methodology

Performance Calculation

At the time of inception of the conviction list, all members are based at 100. Each stock is equally weighted, so that every member has the same probability to add value to the list. The selection is made using a bottom-up approach and may not be read as a portfolio construction.

Performance of Conviction Lists and the members is calculated every week based on Monday's closing price or last trading day in case of a holiday. Rebased level for Conviction List members is obtained by applying the change in the share price (current price/last week price) to the previous rebased level. Rebased level for the Conviction Lists is obtained by averaging the rebased levels for all the conviction list members.

Conviction List Change

Performance is also calculated as mentioned above at the time of any change in Conviction Lists such as inclusion of a new member or removal of an existing member. For inclusion or removal of a member, closing price on the day prior to the announcement is used. In addition, all members are equally weighted again by applying the last rebased level of the Conviction List.

Performance Measurement

Weekly: % change in the current rebased level over previous week's rebased level.

YTD: % change in the current rebased level over the rebased level at the beginning of the year.

Since inception: % change in the current rebased level over the base value (100).

Since inclusion (Conviction List Members): % change in the current rebased level over the rebased level at the time of inclusion.

Potential Upside Calculation

Of Members: is obtained by ascertaining the % difference between the current price and target price.

Of Conviction Lists: is obtained by rebasing the upside potential of members and then averaging these rebased upside potential levels.

Corporate Actions

Dividend payment : the performance methodology does not take into account the impact of dividend payment. Therefore, the lists' performance is purely based on price return calculation.

Stock Split : to adjust the effect a stock split, we adjust the target price by the same ratio as that of the stock split.

Benchmarking

Performance of Conviction Lists is compared with the following relative benchmarks to ascertain the outperformance/underperformance

Global CL (Conviction List) : MSCI AC World

Developed Asia-Pacific CL : MSCI AC Asia Pacific

European CL : MSCI Europe

US CL : S&P 500

Emerging CL : MSCI Emerging Markets

Dividend CL : MSCI World High Dividend Yield

Glossary (1/2)

Societe Generale Private Banking Investment Universe

Societe Generale Private Banking defines and maintains an investment universe, aiming at ensuring the liquidity and the meaningful coverage of companies subject to potential investments. This investment universe complies with rules defined as follows:

- **Issuers are constituents of MSCI indices:** The constituents of the indices retained cover developed and emerging countries with increased precision (average market capitalisation) for Germany, Belgium, France, the UK and Switzerland.
- **Market Capitalisation:** To avoid the inclusion of securities whose market capitalisation could be too low in light of the potential investments by clients and/or managers, only securities whose market capitalisation is greater than €500 mn have been chosen.
- **Liquidity:** To ensure minimum liquidity for investments, only securities with a six-month average daily trading volume greater than EUR 300,000 are selected.
- **Reliable Financial Information:** Only securities tracked by at least three sell side financial analysts are included in the universe.
- **Social and Environmental Responsibility Policy of SG Group:** Societe Generale has defined a framework for Social and Environmental Responsibility. This framework sets out restrictions on listed securities identified by SG Group and deleted from the universe.

Societe Generale Private Banking Recommended Universe

The Recommended Universe is made of companies from the Investment Universe as defined by Societe Generale Private Banking guidelines. Members are chosen by Equity Solutions. There are no lower nor upper limits on the number of stocks in the Recommended Universe. There is no specific constraint in term of geographical or industry representation. A company from the recommended universe can be subject to a rating change, as decided by the Equity Solutions expert covering the company. When a stock is downgraded to a Sell rating, it is still followed for at least 3-month, after which Equity Solutions issues a coverage termination alert.

Financial Terms and Acronyms

ADR (American Depositary Receipt): is a negotiable certificate issued by a US bank representing a specified number of shares in a foreign stock that is traded on a US exchange. ADRs are denominated in US dollars, with the underlying security held by a US financial institution overseas.

BACKLOG: often refers to a company's sales orders waiting to be fulfilled. Even if it provides the revenue visibility, the companies usually try to avoid to have an extensive backlog because that creates the risk of unmet demand and thus can have negative impact on future earnings

BENCHMARK: is, generally, a broad market, market-segment stock or bond index that is used as a reference to evaluate the performance of a security, mutual fund or investment manager.

BV (Book Value): is the total value of net assets of a company. It consists of the firm's fixed assets plus its current assets, minus short-term liabilities, long-term creditors and any provisions.

BV/S (Book Value Per Share): is the total value of the net assets of a company divided by the total number of outstanding shares.

C/I (Cost Income Ratio): is used for valuing banks. It shows a company's costs in relation to its income. Formula: $(\text{Operating Costs}/\text{Operating Income}) \times 100$.

CAGR (Compound Annual Growth Rate): is a term used for the geometric progression ratio that provides a constant rate of return over a specific time period.

CAPEX (Capital Expenditure): is the fund used by the company to acquire or upgrade the physical assets such as property, industrial buildings or equipment. The most capital intensive industries include oil, telecom and utilities.

CAR (Capital Adequacy Ratio): is a measure of a bank's capital. It is expressed as a percentage of a bank's risk-weighted credit exposures. Formula: $(\text{Tier One Capital} + \text{Tier Two Capital})/\text{Risk Weighted Assets}$.

CET I (Common Equity Tier I Ratio) : is a measure of the bank's common equity capital as a percentage of risk-weighted assets. It is generally compared to a defined benchmark stipulated by the regulatory authority to determine whether a bank is sufficiently capitalised.

DIVIDEND YIELD: Dividend per share or DPS (total dividend paid out divided by the total number of shares) expressed as a percentage of current stock price.

EBIT (Earnings Before Interest and Taxes): profit before taking into account interest payments and income taxes. Also referred to as operating income, it is calculated as a company's gross income minus all its operating expenses.

Financial Terms and Acronyms (contd.)

EBIT Margin: Ratio that expresses EBIT as a percentage of total sales $(\text{EBIT}/\text{Sales} \times 100)$; also referred to as operating margin.

EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortisation): profit before taking into account interest payments, income taxes and non-cash operating expenses (depreciation and amortisation). It is calculated as a company's gross income minus its cash operating expenses only.

EM (Emerging Market) : is a country that has some characteristics of a developed market, but does not meet standards to be a developed market. This includes countries that may become developed markets in the future or were in the past.

EPS (Earnings Per Share): is the division of total net profit by the number of shares.

EV (Enterprise Value) is a measure of a company's value, often used as an alternative to straightforward market capitalisation. It is calculated as $(\text{market cap} + \text{debt} + \text{minority interest} + \text{preferred shares}) - \text{total cash} - \text{cash equivalents}$.

EV/EBITDA: compares the total value of the company to its EBITDA.

EV/SALES: compares the total value of the company to its sales.

FCF (Free Cash Flow): represents the difference between operating cash flow and capital expenditures and shows the company's ability to generate shareholder's value after laying out the money required to maintain or expand its asset base. Without enough cash, it would be difficult for a company to develop new products, make acquisitions, pay dividends and reduce debt.

FFO (Funds from Operations): measures a REIT's operating performance. It is net income plus gains (minus losses) from property sale and purchase. Non-cash expenses like depreciation and amortisation are added back because value of real estate tends to rise over time rather than depreciating like other fixed assets and investments. FFO per share is often used in place of earnings per share when analysing REITs.

FY1 (Fiscal Year One): refers to the current fiscal year.

FY2 (Fiscal Year Two): refers to the next fiscal year.

FY16E: Fiscal year 2016 estimation, **FY17E:** Fiscal year 2017 estimation

GDP (Gross Domestic Product): is the monetary value of all the finished goods and services produced within a country's borders in a specific time period.

GDR (Global Depositary Receipt): is very similar to an ADR. It is a bank certificate issued in more than one country for shares in a foreign company. The shares are held by a foreign branch of an international bank. The shares trade as domestic shares, but are offered for sale globally through the various bank branches.

GOODWILL: is an intangible asset that arises as a result of the acquisition of one company by another company for a premium value and can have as origin the value of a company's brand name, solid customer base, good customer relations, good employee relations and any patents or proprietary technology.

GROSS INCOME: gross profit calculated as a company's total sales minus its cost of goods sold (COGS) that corresponds to labour and production costs.

GROSS MARGIN: expresses gross income as a percentage of total sales $(\text{Gross Income}/\text{Sales} \times 100)$.

IPO (Initial Public Offering): is the first sale of stock by a private company to the public to expand its growth or, sometimes, repay its debt.

LIKE FOR LIKE (LFL) GROWTH: is a measure of growth in sales, adjusted for new or divested businesses. This is a widely used indicator of retailers' performance. This adjustment is important in businesses that show a significant change through expansion, disposals or closures.

LTV (Loan-To-Value Ratio): is a financial term used to express the ratio of a loan to the value of an asset purchased. The term is commonly used by financial institutions and real estate companies to represent the ratio of the loan as a percentage of the total appraised value of real property.

NAV (Net Asset Value): is similar to book value and is also called per investment unit. NAV is the marked-to-market value of the company's property investments less liabilities.

ND (Net Debt): is calculated as a company's total debt minus cash and other similar liquid assets.

NET MARGIN: is a financial ratio which measures the profitability of the net income of a company. Formula: $\text{Net Profit}/\text{Sales}$.

NI (Net Income or Bottom Line): represents a company's total earnings (or profit) which is calculated by adjusting revenues for the costs, depreciation, interest, taxes and other expenses.

OPERATING MARGIN: See definition of EBIT Margin.

Glossary (2/2)

ORGANIC GROWTH: is the growth rate that a company can achieve by increasing its output and enhancing sales, excluding any profits or growth from takeovers or M&A activities.

P/E or PER (Price Earnings Ratio): reflects the trading price of a share in relation to the expected earnings. Formula: Share Price/Earnings Per Share.

P/TBVS (Price To Tangible Book Value): expresses the share price with regard to the accounting value of the company. Formula: Share Price/Tangible Book Value Per Share.

PAYOUT RATIO: is the proportion of earnings paid out as dividends to shareholders and typically expressed as a percentage. A lower payout ratio is generally preferable to a higher payout ratio. A ratio greater than 100% indicates the company is paying out more in dividends than it makes in net income.

PMI (Purchasing Managers Index): is an indicator of the economic health of the manufacturing sector. The PMI is based on five major indicators: new orders, inventory levels, production, supplier deliveries and the employment environment

PROFIT WARNING: is the announcement made by the company before its earnings release indicating the investors that its earnings would not meet the analysts' expectations.

RWA (Risk Weighted Assets): is a measure of the bank's assets, weighted according to their risk. It involves the risk weighting of both on and off-balance-sheet exposures. It is generally used to calculate risk-based capital ratio which is the ratio of a bank's capital to its risk weighted assets.

REVENUE GROWTH: Illustrates the growth of sales over a given period.

ROA (Return on assets): a financial ratio that is calculated as net income divided by total assets and shows how profitable a company is relative to its total assets

ROC (Return on invested capital): a profitability ratio which is calculated as net income minus dividends divided by total invested capital.

ROE (Return On Equity): The amount of net income returned as a percentage of shareholders' equity. Return on equity measures a corporation's profitability by disclosing how much profit a company generates with the money shareholders have invested.

SHARE BUYBACK (Share Repurchase): A program by which a company buys back its own shares from the marketplace, reducing the number of outstanding shares. It usually indicates that the company's shares are undervalued and pushes the share prices up. **SHAREHOLDER'S EQUITY:** is the amount of the funds contributed by the owners (the stockholders) plus the retained earnings (or losses).

STOCK SPLIT: is a corporate action in which the company divides its existing shares into multiple shares to make shares seem more affordable for small investors without changing the underlying value of the company.

TBV (Tangible Book Value): is the book value excluding intangible assets.

TBVS (Tangible Book Value Per Share): allows to estimate the accounting value of a company by measuring its stockholders' equity per share. Formula: Re-valued Net Assets/Total Shares of Company.

WACC (Weighted Average Cost of Capital): also referred to as the firm's cost of capital, it is the rate that a company is expected to pay on an average to all its security holders to finance its assets.

WORKING CAPITAL: is the difference between a company's current assets and current liabilities and shows whether the company has sufficient short-term assets to cover its short-term debts.

Indices

MSCI AC WORLD: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 23 developed market country indexes: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK, and the US (as of 2 June 2014).

MSCI AC ASIA PACIFIC: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the developed and emerging markets in the Pacific region. The MSCI AC Pacific Free Index consists of the following 12 developed and emerging market countries: Australia, China, Hong Kong, Indonesia, Japan, Korea, Malaysia, New Zealand, the Philippines, Singapore, Taiwan, and Thailand (as of 2 June 2014).

MSCI EUROPE: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the developed markets in Europe. The MSCI Europe Index consists of the following 15 developed market country indexes: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the UK (as of 2 June 2014).

MSCI EMERGING MARKETS: is a free float-adjusted market capitalisation index that is designed to measure equity market performance of emerging markets. The MSCI Emerging Markets Index consists of the following 23 emerging market country indexes: Brazil, Chile, China, Colombia, the Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey* and the UAE (as of 2 June 2014).

MSCI WORLD HIGH DIVIDEND YIELD: is based on the MSCI World Index, its parent index, and includes large- and mid-cap stocks across 23 Developed Markets (DM) countries (as of 31 March 2014). The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.

MSCI WORLD VALUE: captures large- and mid-cap securities exhibiting overall value style characteristics across 23 Developed Markets countries (as of 31 March 2014). The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. With 853 constituents, the index targets 50% coverage of the free float-adjusted market capitalisation of the MSCI World Index.

MSCI WORLD GROWTH: captures large- and mid-cap securities exhibiting overall growth style characteristics across 23 Developed Markets countries (as of 31 March 2014). The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

MSCI WORLD SMALL CAP: captures small cap representation across 23 Developed Markets (DM) countries (as of 31 March 2014). With 4,302 constituents, the index covers approximately 14% of the free float-adjusted market capitalisation in each country.

MSCI WORLD LARGE CAP: captures large-cap representation across 23 Developed Markets (DM) countries (as of 31 March 2014). With 737 constituents, the index covers approximately 70% of the free float-adjusted market capitalisation in each country.

MSCI EMEA: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the emerging market countries of Europe, the Middle East and Africa. The MSCI EM EMEA Index consists of the following 10 emerging market country indexes: the Czech Republic, Greece, Hungary, Poland, Russia, Turkey, Egypt, South Africa, Qatar and the UAE.

MSCI LATAM: captures large- and mid-cap representation across five emerging market (EM) countries (as of 31 March 2014) in Latin America. With 137 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country.

MSCI EMERGING ASIA: captures large and mid-cap representation across eight EM countries (as of 31 March 2014). With 537 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country.

MSCI RUSSIA: is designed to measure the performance of the large- and mid-cap segments of the Russian market. With 22 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in Russia.

MSCI BRAZIL: is designed to measure the performance of the large- and mid-cap segments of the Brazilian market. With 70 constituents, the index covers about 85% of the Brazilian equity universe.

MSCI INDIA: is designed to measure the performance of the large- and mid-cap segments of the Indian market. With 64 constituents, the index covers approximately 85% of the Indian equity universe.

Euro Stoxx 50: is the leading blue-chip index for the eurozone and provides a blue-chip representation of supersector leaders in the Eurozone. The index covers 50 stocks from 12 Eurozone countries. The Index is licensed to financial institutions to serve as underlying for a wide range of investment products such as Exchange Traded Funds (ETF), Futures and Options and structured products.

FTSE 100: comprises the 100 most highly capitalised blue chip companies, representing approximately 81% of the UK market. It is used extensively as a basis for investment products, such as derivatives and exchange-traded funds.

S&P 500: includes 500 leading companies in the leading industries of the US economy. It is a core component of the US indices that could be used as building blocks for portfolio construction. It is also the US component of S&P Global 1200.

Nikkei 225: is the leading index of Japanese stocks. It is a price-weighted index comprised of Japan's top 225 blue-chip companies on the Tokyo Stock Exchange. The Nikkei is equivalent to the Dow Jones Industrial Average Index in the US.

Important Disclaimer (1/2)

Société Générale Private Banking ("SGPB") is a division of the group Société Générale S.A. operating through its head office within Société Générale S.A. and its network (subsidiaries or branches or departments of Société Générale S.A.), located in various countries, hereinafter mentioned, acting under the "Société Générale Private Banking" brand, and distributors of the document.

Subject of the document

The present document has been prepared by the experts of the group Société Générale S.A. and more particularly of Société Générale Private Banking division, to provide you with information relating to some financial and economic data. The name and function of the people having prepared this document are indicated in the first pages of this document.

This document is non-independent research and is a marketing communication. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and the investment service provider is not subject to any prohibition on dealing ahead of the dissemination of investment research.

In order to read and understand the financial and economic information included in this document, you will need to have knowledge and experience of financial markets.

The content of this document only aims to provide simple information to help you to make your investments or disinvestments decisions, and it shall not constitute a personal recommendation. You keep the liability of your asset's management, and you remain free concerning your investment decisions.

Moreover, the document may mention financial products / asset classes that are not authorized / marketable in certain countries, and / or which might be reserved for certain categories of investors. Therefore, should you wish to make an investment, as the case may be and according to the applicable laws, your advisor within your Société Générale Private Banking entity will check whether this investment is possible within your jurisdiction and whether it corresponds to your investment profile.

Conflict of interest

This document contains the views of SGPB experts. Société Générale trading desks may trade, or have traded, as principal on the basis of the expert(s) views and reports. In addition, SGPB experts receive compensation based, in part, on the quality and accuracy of their analysis, client feedback, revenues of their entity of the Société Générale group and competitive factors.

As a general matter, entities within the Société Générale group may make a market or act as a principal trader in securities referred to in this report and can provide banking services to the companies mentioned in that document, and to their subsidiary. Entities within the Société Générale group may from time to time deal in, profit from trading on, hold on a principal basis, or act as advisers or brokers or bankers in relation to securities, or derivatives thereof, or asset class(es) mentioned in this document.

Entities within the Société Générale group may be represented on the supervisory board or on the executive board of such persons, firms or entities. Employees of the Société Générale group, or persons/entities connected to them, may from time to time have positions in or hold any of the investment products/ asset class(es) mentioned in this document.

Société Générale may acquire or liquidate from time to time positions in the securities and/or underlying assets (including derivatives thereof) referred to herein, if any, or in any other asset, and therefore any return to prospective investor(s) may directly or indirectly be affected.

Entities within the Société Générale group are under no obligation to disclose or take into account this document when advising or dealing with or on behalf of customers. In addition, Société Générale may issue other reports that are inconsistent with, and reach different conclusions from the information presented in this report and is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report.

Société Générale group maintains and operates effective organisational and administrative arrangements taking all reasonable steps to identify, monitor and manage conflicts of interest. To help the Société Générale Private Banking Entities to do this, they have put in place a management of conflicts of interest policy designed to prevent conflicts of interest giving rise to a material risk of damage to the interests of SGPB clients. For further information, SGPB clients can refer to the management of conflicts of interest's policy, which was provided to them by the SGPB entity of which they are clients.

General Warning

This document is subject to modifications and is given for purely informative purposes; it does not constitute a contract. This material has been prepared for information purposes only and is not intended to provide investment advice nor any other investment service and the document does not constitute and under no circumstances should it be considered in whole or in part as an offer, a solicitation, advice, a personal recommendation, nor an invitation to invest in the investment products and/or in any class of assets mentioned herein from any of the Société Générale Private Banking entities.

The information indicated in this document shall not be considered as legal or tax or accounting advice. The analysis made in this document is made as a whole and cannot be dealt with separately.

You should be aware that the investment to which this material relates may involve numerous risks. The amount of risk may vary but can expose you to a significant risk of losing all of your capital, including a potential unlimited loss. Accordingly these products or services may be reserved only for a certain category of eligible investors such as those who are sophisticated and familiar with these types of investment and who understand the risks involved.

Accordingly, before making an investment decision, as the case may be and according to the applicable laws, the potential investor will be questioned by his advisor of his Société Générale Private Banking entity as to his eligibility for the envisaged investment, and the compatibility of the investment with his investment profile and objectives. He should also consult his own independent financial, legal and tax advisers to obtain all the financial, legal and tax information which will allow him to appraise the characteristics and the risks of the envisaged investment, as well as his tax treatment, in light of his own circumstances.

The full understanding and agreement to the related contractual and informative documentation including the documentation relating to the relevant risks is required from the potential investor prior to any investment. The potential investor has to remember that he should not base any investment decision and/or instructions solely on the basis of this document. Any investment may have tax consequences and it is important to bear in mind that the Société Générale Private Banking entities do not provide tax advice. A potential investor should consider seeking independent tax advice (where appropriate). The level of taxation depends on individual circumstances and such levels and bases of taxation can change.

The investment product(s)/asset class(es) described in this document may not be eligible for sale or subscription in all jurisdictions or to certain categories of investors. It is the responsibility of any person in possession of this document to inform to be aware of and to observe all applicable laws and regulations of relevant jurisdictions. This document is not intended to be distributed to a person or in a jurisdiction where such distribution would be restricted or illegal. This document is in no way intended to be distributed in or into the United States of America nor directly or indirectly to any U.S. person.

The price and value of investments and the income derived from them can go down as well as up. Changes in inflation, interest rates and exchange rates may have an adverse effect on the value, price and income of investments issued in a different currency from that of the client. The simulations and examples included in this document are provided only for informational and illustration purposes alone. The present information may change with market fluctuations and views reflected in this document may change.

The Société Générale Private Banking entities disclaim any responsibility to update or make any revisions to this document. The purpose of this document is to inform investors who shall make their investment decisions without overly relying on the document.

The Société Générale Private Banking entities disclaim any responsibility for direct or indirect losses related to any use of this publication or its content. The Société Générale Private Banking entities offer no implicit or explicit guarantees as to the accuracy or exhaustivity of the information or as to the profitability or performance of the asset classes, countries and relevant markets.

The investment product(s)/asset class(es) described herein may be issued by issuer(s) whose credit rating is provided by a rating agency and which can vary. The Société Générale Private Banking entities are not responsible for any risk in respect of such issuer(s) including but not limited to risk of default of such issuer(s).

This document does not purport to list or summarize all of the financial products' terms and conditions, nor to identify or define all or any of the risks that would be associated with the purchase or sale of the financial product(s)/asset class(es) described herein.

The historical data and information herein, including any quoted expression of opinion, have been obtained from, or are based upon, external sources that the Société Générale Private Banking entities believe to be reliable but have not been independently verified and are not guaranteed as to their accuracy or completeness. The Société Générale Private Banking entities shall not be liable for the accuracy, relevance or exhaustiveness of this information. Information about past performance is not a guide to future performance and may not be repeated. Investment value is not guaranteed and the value of investments may fluctuate. Estimates of future performance are based on assumptions that may not be realised, and should not be deemed an assurance or guarantee as to the expected results of investment in such investment products and/or asset class(es).

This document is confidential, intended exclusively to the person to whom it is given, and may not be communicated nor notified to any third party (with the exception of external advisors on the condition they themselves respect this confidentiality undertaking) and may not be copied in whole or in part, without the prior written consent of the relevant Société Générale Private Banking entity.

Potential risks in case of an investment

Risk of loss of the total amount invested, volatility risk, risk linked to small and mid capitalization, credit risk, counterparty risk, issuer's risk, liquidity risk, risk linked to discretionary management, change risk, market risk.
